

Four "How To" Programs for Sustainable Living

All Things Solar

April 26

Greening Your Building

June 28

Community Power

August 23

Heating Your Home

October 25

Sundays

1:00 to 3:00 p.m.

Ted Stroebele

Neighborhood Facility

Monticello

The Sullivan County ..
Conservation Education'
Network *is an inclusive partnership*
that uses education to promote a
sustainable environment and commerce.

This collaborative effort is supported by:

- Basha Kill Area Association
- Catskill Mountainkeeper
- Delaware Highland Conservancy
- Sullivan Alliance for Sustainable Development
- Sullivan County Department of Planning and Environmental Management
- Sullivan County Office of Sustainable Energy
- SPECS (*Special Protection of the Environment for the County of Sullivan*)
- Sullivan Renaissance

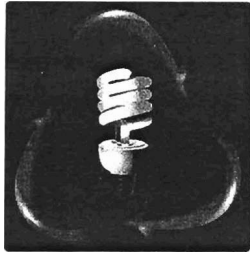

For information and to register
Call 845-482-5400

Sullivan County Conservation Education Network

A series of workshops providing
"how-to" resources for families and
individuals who would like to take
specific and **practical steps** to make
their homes (and businesses) more
sustainable, lower their carbon
footprint and **save money.**

The goal of the Sullivan County Conservation Education Network "How to" series is to provide attendees with practical knowledge of how to minimize their energy bills, how to install alternative energy sources in their own homes and communities, and to learn about sustainable living. Exhibitors and professionals will be on hand to answer "how to" questions and to discuss sustainable living.

Programs are *free* and open to everyone. Refreshments will be provided. To pre-register or for more information please call: 845-482-5400.

The **SULLIVAN COUNTY CONSERVATION EDUCATION NETWORK** is sponsoring a series of workshops on Sundays from **1:00 to 3:00 p.m.** at the **Ted Stroebele Neighborhood Facility in Monticello.**

SUNDAY APRIL 26

ALL THINGS SOLAR

Use the sun's power to benefit your home or business. Experts in solar electric and solar thermal will explain the technology. Speakers include Fran Notte of ETM Solar Works in Endicott, NY who will present on solar electric; and Gordon Smith of Renewable Energy Solutions in Hankins, NY who will speak on solar thermal.

SUNDAY JUNE 28

GREENING YOUR BUILDING

Many modern materials and techniques help to create a buildings that are warm, healthy and efficient. Beginning with a real home or business assessment (or audit), speakers will explain how to spend \$50 to save \$200. Bring copies of your electric and fuel bills.

SUNDAY AUGUST 23

COMMUNITY POWER

Some projects are bigger than an individual or business – wind energy, solar panels on public buildings and hydro-electric dams. Learn the basic steps needed for a community to lower its collective carbon footprint and control its own power.

SUNDAY OCTOBER 25

HEATING YOUR HOME

As winter approaches, thoughts turn to cold winds and snow. New technologies allow homes to be heated by using geo and hydro-thermal systems, space heaters and wood. A serious look at staying warm economically.
